

FABER-CASTELL

since 1761

Facts & figures

Founded
1761 (oldest company in the industry)

Family company
Owned by the same family for nine generations

Production of wood-cased pencils
2.3 billion graphite and colour pencils a year

Branches
Production facilities in 10 countries
Sales companies in 22 countries

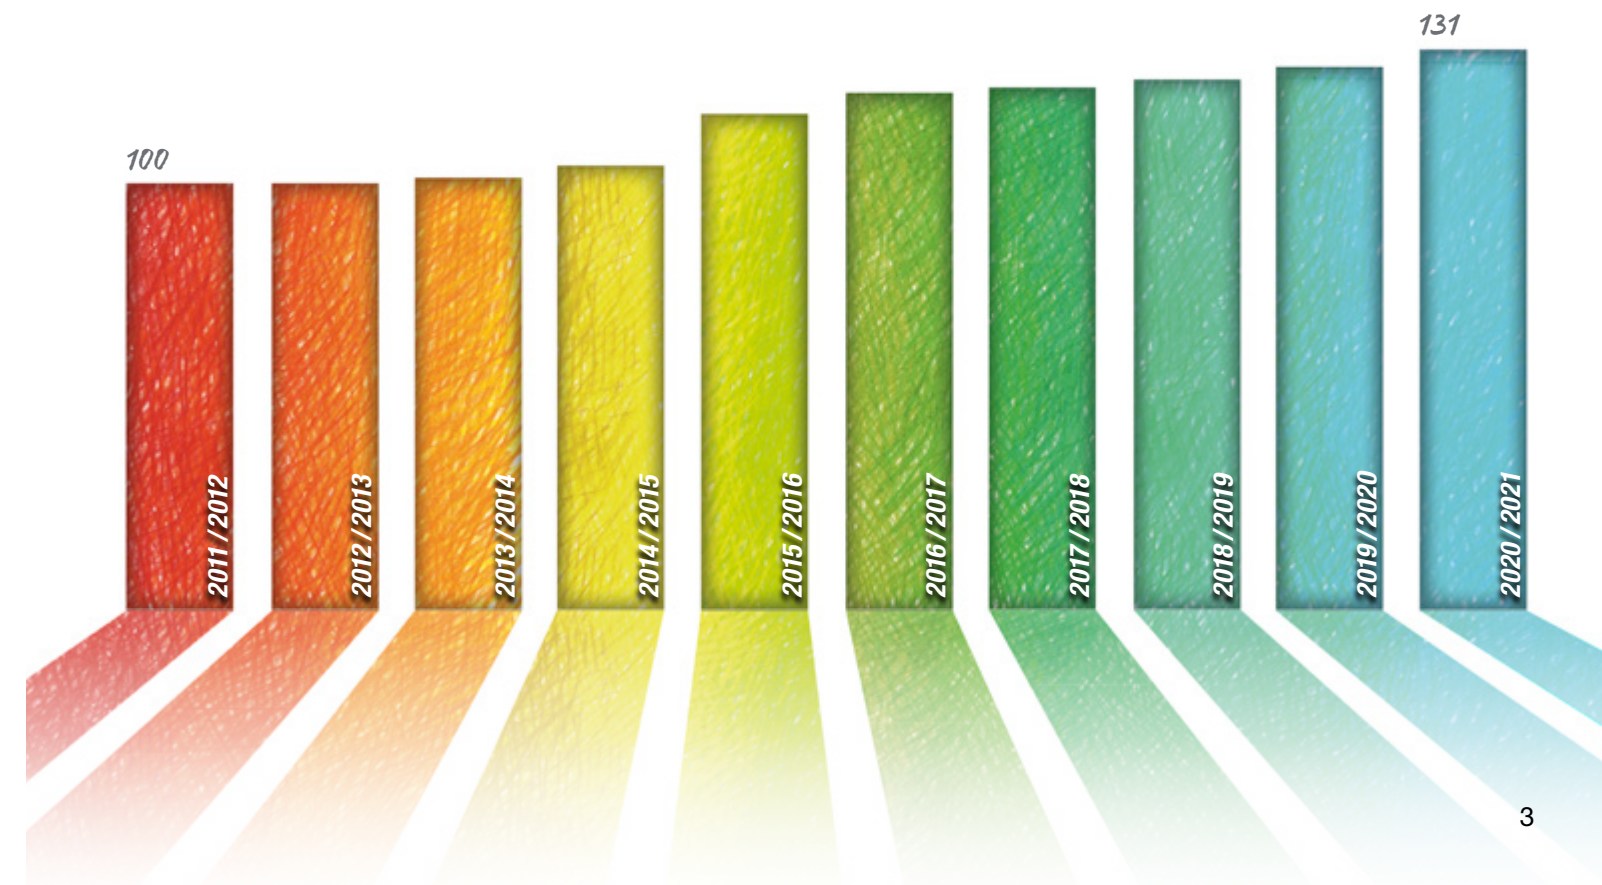

Employees
6,500 worldwide
1,000 in Germany

Marketing
In more than 120 countries

Faber-Castell sales continue to grow

Innovative products of outstanding quality have enabled Faber-Castell to continuously increase its turnover. (Source: Faber-Castell. The diagram shows the development of sales in Europe since 2011/12, Index = 100). Faber-Castell remains market leader in Europe.

Carbon-neutral production

Sustainable commitment

Faber-Castell's forests in Prata, Southeast Brazil, absorb 900,000 tonnes of carbon dioxide (CO₂), according to a scientific study by TÜV-Rheinland® in 2012. The 10,000 hectare forestry product not only secures stocks of sustainable wood but also protects the environment through photosynthesis, which converts the CO₂ into biomass.

The pine trees and forests in Prata, one third of which have been left untouched, therefore neutralise the climate-relevant carbon footprint of Faber-Castell's production facilities. Large parts of the forests have become a habitat for rare species of animals and plants, which is particularly important. A respectful interaction with nature is key alongside sustainability.

Wood from certified sustainable forestry is the most important raw material for the Faber-Castell product range.

The Faber-Castell Group works on reducing plastics or replacing them with recycled materials in packaging and products.

As a world leader in the production of erasers, Faber-Castell avoids the use of harmful softeners. The erasers are produced under strict quality control and are PVC-free.

Every product contains valuable raw materials. To extend their usability, many products can be refilled.

Further information can be found on our sustainability webpage and in our sustainability Fact Sheet. <https://www.faber-castell.com/corporate/sustainability>

Certifications and seals

Sustainable commitment

Carbon-neutral production

We contribute to climate protection through the annual calculation and management of our carbon footprint from all production sites. The emissions are neutralized through the sequestration of carbon in our forests in Brazil.

Carbon-neutral production

The CO₂ emissions caused by the manufacturing process of this product are neutralized by certified projects.

Carbon-neutral production

For our carbon neutral products Faber-Castell cooperates with Climate Partner, a globally active organisation, and supports certified climate protection projects to offset CO₂ emissions. All CO₂ emissions generated during material extraction, the production process and transport to production were offset. For more information, go to: www.climatepartner.com

Carbon-neutral product (only for externally certified products)

Certified projects have compensated CO₂ that occurs during the procurement of materials, production and transport of this product to the production site.

Certifications and seals

Sustainable commitment

ISO 9001 / ISO 14001

All production sites in the Faber-Castell Group are certified according to the international norms to ensure that the quality and environmental protection standards are met.

FSC®

More than 90 % of the wood used for the worldwide production of Faber-Castell pencils come from 100 % FSC-certified forests, and thus originate from responsible sources.

PEFC

Faber-Castell uses PEFC-certified wood as an alternative to FSC-certified wood. Both certification schemes ensure the sustainable management and use for forest resources.

Eco Pencil

Timber from certified sustainable forestry (e.g. FSC, PEFC, SFI).

Waterbased Varnish

Faber-Castell was the first manufacturer to introduce the environmentally-friendly water-based varnish technology, which is used for almost all writing instruments produced at the main factory in Stein.

PVC-Free

As a world leader in the production of erasers, Faber-Castell avoids the use of harmful softeners. The erasers are produced under strict quality control and are PVC-free.

Refillable

Every product contains valuable raw materials. To extend their usability, many products can be refilled.

Recycled plastic / recycled cardboard

Faber-Castell works on reducing plastics or replacing them with recycled materials. The products or packaging are made of recycled plastic or cardboard.

Recyclable cardboard

The packaging is made of recyclable cardboard.

PoS systems

Our PoS concept backs up our expertise and creates additional sales impetus. Decisions made easy – your customers will quickly find what they're looking for, and may even buy more than they intended.

- › Clear layouts
- › Informative panels leave few questions unanswered
- › Attractive eye-catchers for your shop

For more information on displays and filling proposals, please contact your sales representative.

black beaches as a result of volcanic activity - are by unique spectacles.

The contrast against the water arouses the passion for discovery.

Encouraging us to explore new perspectives.

Fine Writing

AMBITION

The slender Faber-Castell icon AMBITION is restrained so there is more room for what counts: the thoughts to which you give shape. The AMBITION is a free spirit with clear lines. We were inspired by writers, authors and wordsmiths. To what will this elegant expert inspire you?

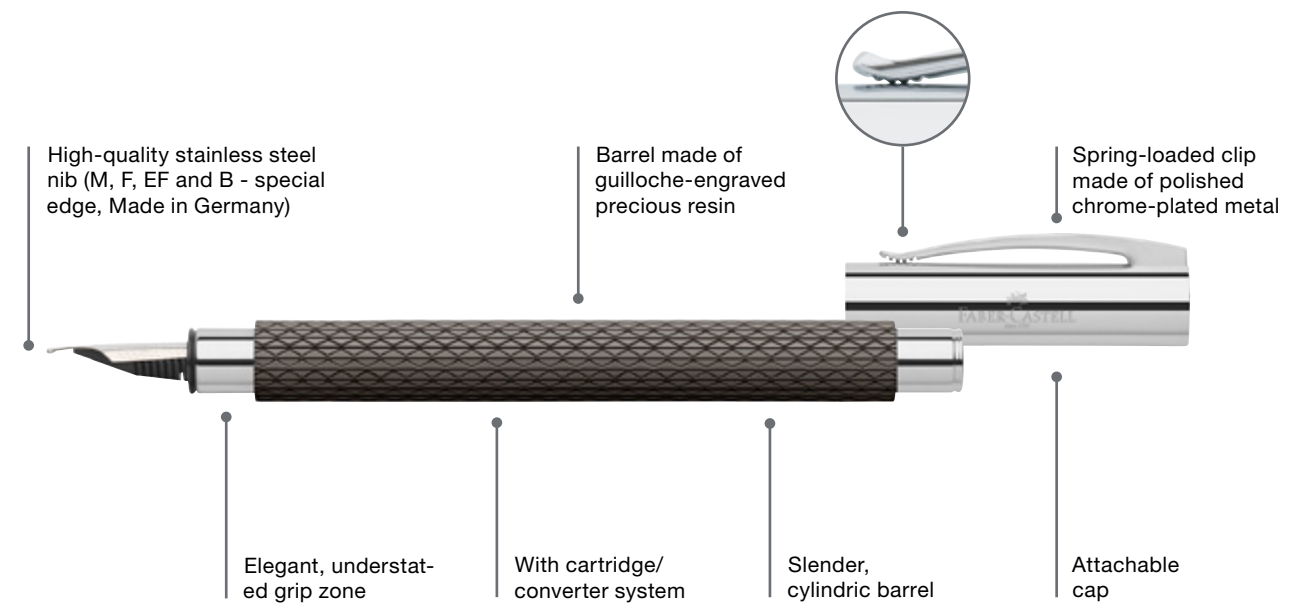

Image shows original size

Success story AMBITION OpArt

„OpArt“, also known as Optical Art has its origin in the 1960s in the fashion and design scene. It is a style of visual art that uses optical illusions such as the illusion of movement or flicker effects. The special distinguishing feature of the AMBITION OpArt writing instruments is the fine guilloche pattern on the barrel, which creates a characteristic geometric colour and shape pattern. The 13th Limited Edition in the history of the series pays homage to the oceans.

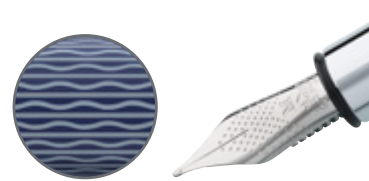

Ambitious researchers got to the bottom of the question of what is hidden in the vast deep sea and with their courage, they have enriched us with incredible knowledge. Extraordinary landscapes shaped by valleys and mountains, over 4,000 new species of animals and life even at depths of almost 11,000 meters are among their amazing discoveries.

We owe remarkable discoveries to people who believe in more. If you also believe in more, then the AMBITION OpArt Deep Water is perfect for you: AMBITION shows as much character as the heroes of the deep sea. Gather your courage and start your own personal journey of discovery with the new writing instruments in Deep Water. What you discover in your next chapter is up to you. Line by line your ambition. Every word your story.

AMBITION OpArt Deep Water.

The rich dark blue, complemented by a lighter shade of blue, creates a colour pattern reminiscent of deep water. Inspired by this interplay of colours, the new colour of the Ambition OpArt writing instruments is called "Deep Water". While stocks last.

147120 - 22 Fountain pen
Nib sizes: 0 = M, 1 = F, 2 = EF

Essentio

Good looks, a gentle feel and a comfortable grip: Essentio combines ergonomics with comfort. Made of materials as diverse as the world and their history making creative personalities. Which turn will your story take with this creative everyday companion?

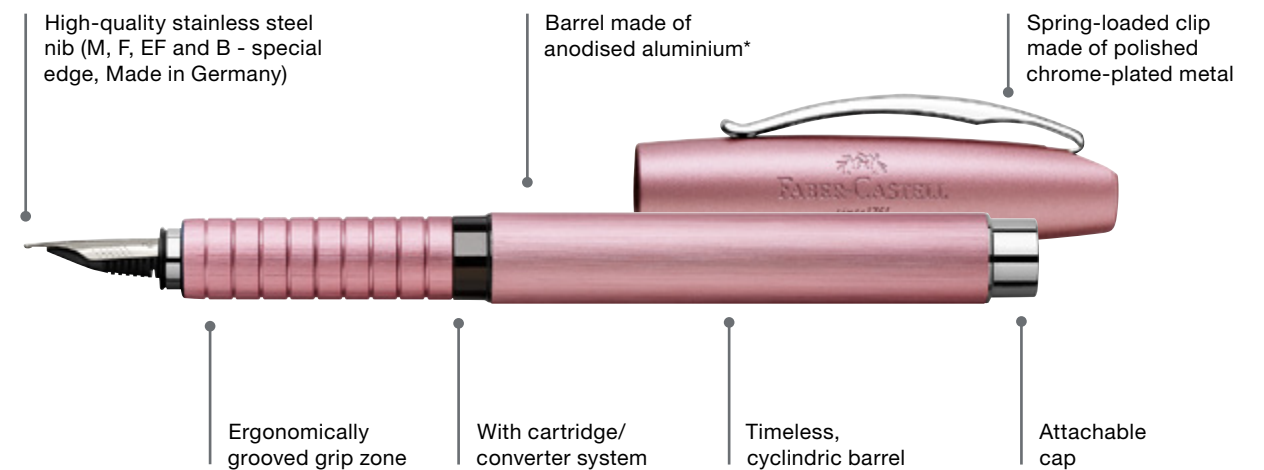

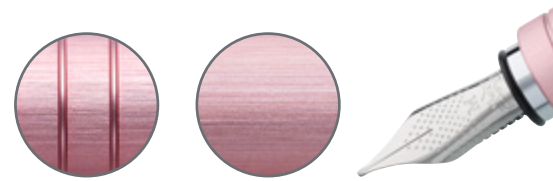

Image shows original size

* Anodising means that the aluminium is treated to form a protective outer layer of oxide. This protective layer gives the Essentio Aluminium its special colour and makes it even more robust.

Essentio Aluminium.

High-quality barrel and grip zone are made of aluminium and are refined with an oxide layer by a sophisticated process. This ensures a certain sturdiness of the surface and an elegant colour.

HEXO

Every word a feeling. And one step closer with every line: Closer to perhaps your best work. The songwriter's creative process inspired us to create the new HEXO. The hexagonal companion shows corners and edges. It owes its shape to probably the most famous pencil from Faber-Castell: The green Castell 9000.

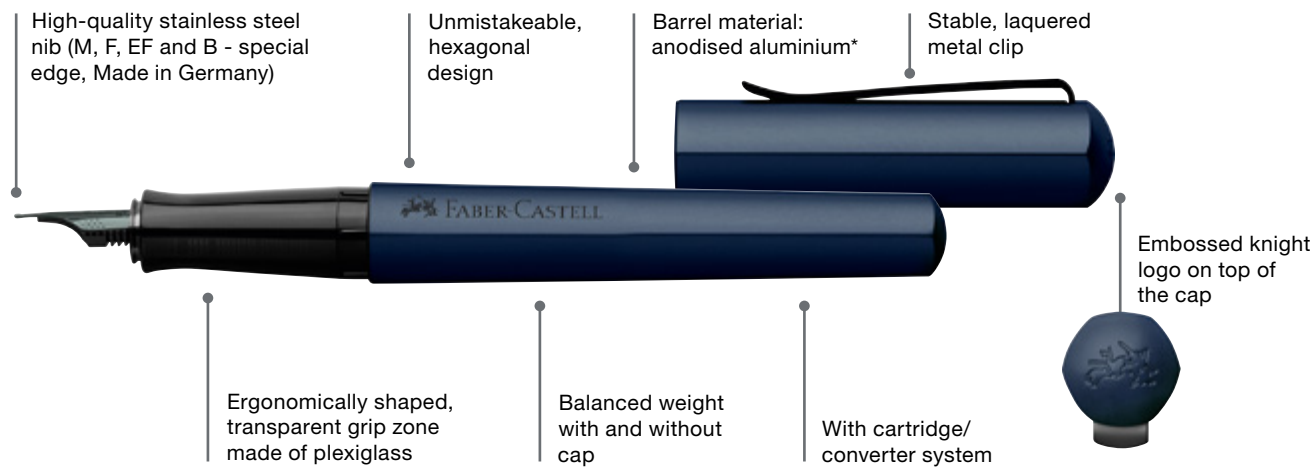

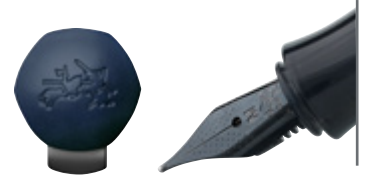

Image shows original size

* Anodising means that the aluminium is treated to form a protective outer layer of oxide. This protective layer gives the HEXO its special colour and makes the lightweight even more robust.

HEXO blue.

Timeless blue is shown more and more frequently in the world of design and has elaborated to a trend colour. This timeless colour spreads a feeling of calmness, harmony and safety.

Fountain pen knowledge

Nib widths.

All nib widths are suitable for right- and left-handers, thanks to the special cut of the iridium corn.

The fountain pen only writes fluently when both nib wings glide on the paper when writing. Therefore different nib widths are offered. The width of the nib should be adjusted to the individual writing posture and typeface.

Faber-Castell

EF (extra fine):
For light handwriting without pressure.
Very fine typeface.

Faber-Castell

M (medium):
Suitable for any handwriting. Medium line width with normal writing pressure.

Faber-Castell

F (fine):
For a small handwriting with little pressure.
Fine typeface.

Faber-Castell

B (broad):
For large handwriting and signatures. Strong, broad line width with normal writing pressure.

Life companion fountain pen.

When caring and cleaning the fountain pen regularly, it's a reliable companion - for a lifetime. Fountain pens in general should be cleaned regularly. Even when changing the colour of the ink or when it's dried out.

1. Nib and ink duct should be rinsed under lukewarm, clear running water...
2. ... until no ink stain is recognizable.
3. Afterwards it should be dried with an absorbent paper.

Refill converter.

For a classic and sustainable writing experience, the Fine Writing writing instruments can also be used with a converter.

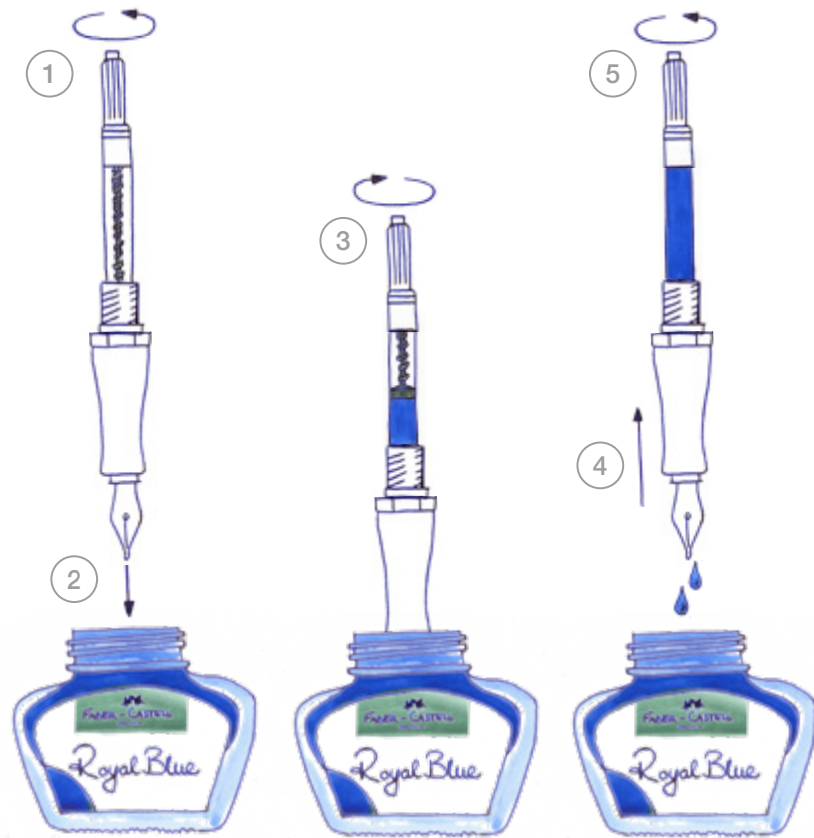

1. Twist the black grip of the converter to the left until the spiral in the transparent tank is completely pushed down.

2. Dip the nib with the converter or the converter alone completely in the ink glass.

3. Twist the black grip of the converter to the right until the tank is completely filled.

4. Pull the nib or converter out of the ink glass.

5. Twist the black grip carefully back to the left, to drip two drops of the ink back to the ink glass. This avoids air in the converter.

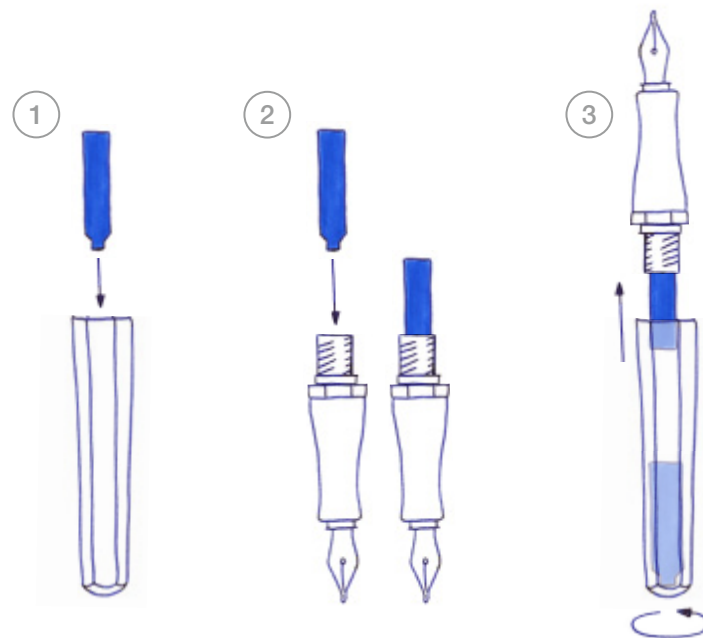

Refill cartridge.

The correct insertion of a cartridge is important to conserve the ink duct. Only small standard cartridges should be inserted in Fine Writing writing instruments.

1. There should always be two cartridges in the fountain pen. The first cartridge should be inserted in the barrel with the top down.

2. Insert the second cartridge controlled and only with soft pressure in the ink duct.

3. Twist the fountain pen barrel on the front piece.

Fine Writing Selective Distribution

e-motion

Every vision needs its form: on paper – or in your hand. The bulbous e-motion brings comfort into the creative process. From writing quick lines to drawing accurate lines, it is a perfectionist that optimally brings out your ideas. We had the world of an architect in mind. But what will you make out of it?

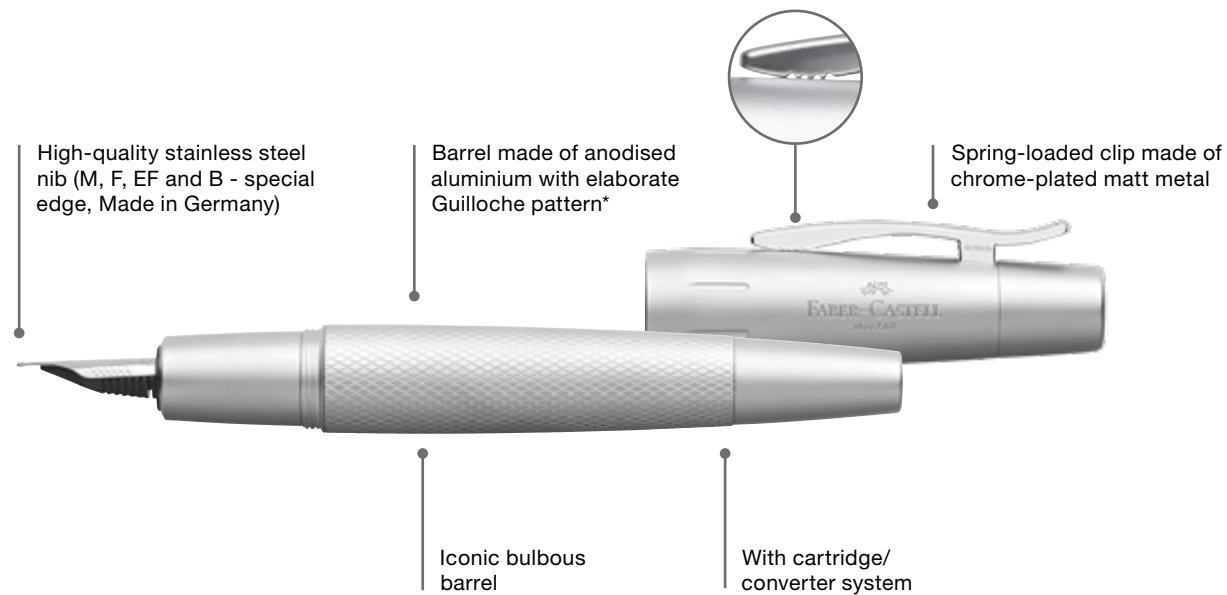

Image shows original size

e-motion Pure Black.

The barrel made of elaborated guilloched black anodised aluminium connects writing comfort with dynamic design. The particularly thick polymer lead of the twist pencil guarantees an individual ductus with an extra soft writing feeling.

148620 - 23* Fountain pen
Nib sizes: 0 = M, 1 = F, 2 = EF, 3 = B
equipped with converter
