

FABER-CASTELL
since 1761

Novelties 2023

Title artwork by Austrian artist Patrick Rosche, June 2022,
done with Polychromos colour pencils and Pitt Graphite Matt.

Sustainable commitment

Carbon-neutral production

Faber-Castell's forests in Prata, Southeast Brazil, absorb 900,000 tonnes of carbon dioxide (CO₂), according to a scientific study by TÜV-Rheinland® in 2012. The 10,000 hectare forestry product not only secures stocks of sustainable wood but also protects the environment through photosynthesis, which converts the CO₂ into biomass. The pine trees and forests in Prata, one third of which have been left untouched, therefore neutralise the climate-relevant carbon footprint of Faber-Castell's production facilities. Large parts of the forests have become a habitat for rare species of animals and plants, which is particularly important. A respectful interaction with nature is key alongside sustainability.

Corporate Carbon
Footprint

www.tuv.com
ID 000040930

Wood from certified sustainable forestry is the most important raw material for the Faber-Castell product range.

The Faber-Castell Group works on reducing plastics or replacing them with recycled materials in packaging and products.

As a world leader in the production of erasers, Faber-Castell avoids the use of harmful softeners. The erasers are produced under strict quality control and are PVC-free.

Every product contains valuable raw materials. To extend their usability, many products can be refilled.

Further information can be found on our sustainability webpage and in our sustainability Fact Sheet.

Sustainable commitment

Certifications and seals

Carbon-neutral production

We contribute to climate protection through the annual calculation and management of our carbon footprint from all production sites. The emissions are neutralized through the sequestration of carbon in our forests in Brazil.

Carbon-neutral production

The CO₂ emissions caused by the manufacturing process of this product are neutralized by certified projects.

Carbon-neutral production

For our carbon neutral products Faber-Castell cooperates with Climate Partner, a globally active organisation, and supports certified climate protection projects to offset CO₂ emissions. All CO₂ emissions generated during material extraction, the production process and transport to production were offset. For more information, go to: www.climatepartner.com

Carbon-neutral product (only for externally certified products)

Certified projects have compensated CO₂ that occurs during the procurement of materials, production and transport of this product to the production site.

Sustainable commitment

Certifications and seals

ISO 9001 / ISO 14001

All production sites in the Faber-Castell Group are certified according to the international norms to ensure that the quality and environmental protection standards are met.

FSC®

More than 90 % of the wood used for the worldwide production of Faber-Castell pencils come from 100 % FSC-certified forests, and thus originate from responsible sources.

PEFC

Faber-Castell uses PEFC-certified wood as an alternative to FSC-certified wood. Both certification schemes ensure the sustainable management and use for forest resources.

Eco Pencil

Timber from certified sustainable forestry (e.g. FSC, PEFC, SFI).

Waterbased Varnish

Faber-Castell was the first manufacturer to introduce the environmentally-friendly water-based varnish technology, which is used for almost all writing instruments produced at the main factory in Stein.

PVC-Free

As a world leader in the production of erasers, Faber-Castell avoids the use of harmful softeners. The erasers are produced under strict quality control and are PVC-free.

Refillable

Every product contains valuable raw materials. To extend their usability, many products can be refilled.

Recycled plastic / recycled cardboard

Faber-Castell works on reducing plastics or replacing them with recycled materials. The products or packaging are made of recycled plastic or cardboard.

Recyclable cardboard

The packaging is made of recyclable cardboard.
